

ON-DEMAND WIRELESS VULNERABILITY MANAGEMENT

- Perform global wireless scans on-demand

- Discover and prioritize all wireless assets on a 24x7 basis

- Perform wireless policy audits

- Generate wireless vulnerability reports with 1-click

- Predictable monthly service fee

- No capital investment required

- No product obsolescence

- 24x7 phone and email support included

SpectraGuard Online

Flexible SaaS Approach to Addressing Wireless Vulnerabilities

SpectraGuard Online is the world's first end-to-end wireless vulnerability management solution that is delivered online, on-demand. With SpectraGuard Online, customers can control their costs and maximize efficiencies while enjoying uncompromised security and performance.

Overcome the Cost and Complexity Barriers of Wireless Vulnerability Management

Affordable

As a hosted solution, SpectraGuard Online eliminates expensive hardware, software, and ongoing maintenance costs. Sold as a subscription service, it offers low, predictable, and consistent fees that fit any operational budget.

Modular

SpectraGuard Online's flexible "pay-as-you-go" model allows you to buy only what you need to get started then upgrade your capabilities incrementally. Start with vulnerability assessment then upgrade to remediation with a simple license key upgrade as your needs grow.

Future-proof

Never pay for hardware or software upgrades, zero-day attack protection or technical support. With SpectraGuard Online, you are completely insured from wireless technology obsolescence.

Vulnerability Assessment

SpectraGuard's Vulnerability Assessment service provides unattended 24x7 wireless scanning to detect wireless activities, identify threats, and identify and prioritize all wireless devices, to accurately assess your organizations wireless security posture.

Regulatory Compliance

SpectraGuard Online meets all your wireless compliance requirements for regulatory standards such as PCI, SOX, HIPAA, GLBA and others. Baseline your wireless security posture against regulatory compliance standards then generate pre-defined wireless compliance reports for PCI, Sarbanes-Oxley (SOX), HIPAA, GLBA, DoD 8100.2, and other regulatory compliance standards with 1-click.

Vulnerability Remediation

SpectraGuard's Vulnerability Remediation provides instant notification of wireless vulnerabilities via email, automated or manual remediation capabilities for common threats, ability to track the location of wireless threats on a floor map, as well as provides the ability to visualize wireless signal spillage from corporate APs.

On-Demand Scanning and 24x7 Monitoring

Wireless Scanners perform on-demand scanning and 24x7 monitoring of wireless activity at locations where they are installed. Each wireless scan can typically scan 20,000 sq. ft of physical area.

Secure Data Centers

AirTight provides secure storage and processing of wireless security data in SAS-70 certified secure data centers. Secure Data Centers are architected for high availability and access is controlled through a triple layer authentication.

Plug and Play Installation

Pre-configured wireless sensors eliminate the need for expensive IT resources for product deployment.

About

AirTight Networks

AirTight Networks is the global leader in wireless security and compliance solutions providing customers best-of-breed technology to automatically detect, classify, locate and block all current and emerging wireless threats. AirTight offers both the industry's leading wireless intrusion prevention system (WIPS) and the world's first wireless vulnerability management (WVM) security-as-a-service (SaaS). AirTight's award-winning solutions are used by customers globally in the financial, government, retail, manufacturing, transportation, education, healthcare, telecom, and technology industries. AirTight owns the seminal patents for wireless intrusion prevention technology with 12 U.S. patents and two international patents granted (UK and Australia), and more than 20 additional patents pending. AirTight Networks is a privately held company based in Mountain View, CA. For more information please visit www.airtightnetworks.com

Secure Web Interface

The Web-based User Interface provides secure access to SpectraGuard Online over the Internet, anytime, anywhere.

Designed for Manageability and Scalability

Distributed WLAN deployments are difficult to administer. Organizations need

enhanced security while minimizing the cost and administrative burden associated with a comprehensive wireless security policy.

As wireless becomes a business utility, the challenge is managing your wireless vulnerabilities, not simply preventing wireless intrusions.

Ensure compliance with PCI DSS wireless requirements using AirTight Networks' automated wireless scanning, audit, and compliance solutions. SpectraGuard® Online automates wireless scanning and requires no IT intervention, making PCI wireless compliance low cost and effortless. SpectraGuard Online is offered as four levels of on-demand services to help you meet the PCI wireless requirements that directly apply to your organizations needs.

SpectraGuard Online	Capabilities
PCI Quarterly Scan Service	<ul style="list-style-type: none"> Automated wireless scanning for compliance of all locations Monthly wireless scan report delivered to inbox for all locations
PCI Quarterly Scan + Alerts	<ul style="list-style-type: none"> Automated wireless compliance scanning PCI report delivered monthly Real time 24x7 intrusion and rogue detection alerts via email
24x7 Wireless Monitoring Service	<ul style="list-style-type: none"> 24x7 wireless LAN monitoring Access to wireless IDS console Real time 24x7 intrusion and rogue detection alerts via email Customized troubleshooting and unlimited reporting
24x7 Wireless Remediation Service **	<ul style="list-style-type: none"> Full wireless IPS capabilities in a SaaS model Monitoring service plus automatic or manual threat prevention Location tracking to locate and remove rogue APs Advanced forensics and troubleshooting Physical inventory and location of all APs
